

Executive Overview Insights

Revenue Performance

- The iTunes store generated approximately:

1.63M total revenue

- Revenue trends remained relatively stable throughout the year, with noticeable dips around:
 - May
 - October–November
 - Revenue recovered again toward December, indicating possible seasonal purchasing behavior.
-

Customer Insights

- The platform served around:

20K customers

- Average invoice value was:

2.66K

This suggests:

- customers frequently purchase multiple tracks/media items
 - strong repeat purchasing behavior may exist
-

Genre Performance Insights

- Rock generated the highest revenue among all music genres.
- Metal and Blues also contributed significantly compared to other genres.
- Niche genres such as Reggae and Latin contributed smaller portions of revenue.

Business Insight:

The company could:

- prioritize promotions for high-performing genres
 - create personalized recommendations around Rock and Metal listeners
 - explore why smaller genres underperform
-

Artist Analysis Insights

- Artists like:
 - AC/DC
 - Aerosmith
 - Alanis Morissette

generated the highest revenue.

Business Insight:

These artists likely:

- drive customer engagement
- attract loyal listeners
- contribute heavily to sales concentration

The business could:

- highlight these artists in campaigns
 - build featured playlists around them
 - negotiate exclusive releases/promotions
-

Track Performance Insights

Top-performing tracks generated significantly higher revenue than average tracks.

Business Insight:

This indicates:

- a small subset of tracks contributes disproportionately to revenue
 - playlist placement and recommendations strongly influence purchases
-

Strategic Recommendations

1. Focus on High-Revenue Genres

Increase marketing around:

- Rock
 - Metal
 - Blues
-

2. Promote Top Artists

Feature best-performing artists on:

- homepage banners
 - playlists
 - recommendation systems
-

3. Investigate Seasonal Revenue Drops

Analyze:

- customer activity during low months
 - promotional gaps
 - release schedules
-

4. Improve Discovery for Smaller Genres

Use:

- targeted recommendations
- curated playlists
- discount campaigns

to increase revenue diversification.
